

Waste Management Policy

Solve Plastic Products Limited is committed to minimizing waste generation and promoting environmental sustainability throughout its PVC pipe manufacturing operations. This policy outlines our approach to responsible waste management.

Key Objectives:

- Reduce waste generation at the source through process optimization and efficient use of materials.
- Maximize the recycling and recovery of waste materials.
- Comply with all relevant environmental regulations and standards.

Implementation Strategies:

- Implement waste segregation and collection systems to facilitate effective recycling.
- Prioritize the use of recycled materials in the manufacturing process whenever feasible.
- Develop procedures for the safe handling, storage, and disposal of hazardous waste.
- Provide training to employees on waste minimization, segregation, and proper disposal practices.
- Monitor and report waste generation and recycling performance to ensure continuous improvement.
- Implement lean management practices to enhance efficiency and reduce waste.
- Conduct training on the principles of 3Ms (Muda, Mura, and Muri) to improve waste management and process efficiency.

By adhering to this waste management policy, Solve Plastic Products Limited aims to conserve resources, reduce contributions to landfills, and promote a circular economy within the PVC pipe industry.
